www.kawaskagasturbines.com

CF Limited Group L.L.C. is a manufacturer's representative and Systems Integration Company with a Focus on Oil and Gas and Energy Related Projects. CF Limited Group has shop / fabrication facilities in Houston, Texas and provides complete Engineering and Design Capabilities related to the Systems Integration for automation platforms..

Today, **Kawasaki Gas Turbines-Americas**, a division of Kawasaki Motors Corp., U.S.A., is a leading manufacturer of small and midsize gas turbine power systems from 1.2 MW to 20 MW. Kawasaki's reputation for making efficient, reliable and low-emissions gas turbine packaged power plants is respected not only in the USA, but around the world. We hold the majority market share for GT power Generation sets for 10 MW's and below - with almost 8,000 GT units installed world-wide. Our product focus is primarily the base load cogeneration markets and backup / standby power markets

Kawasaki Gas Turbines offers the world's most efficient 7.8 MW, 18-cylinder gas Reciprocating Engine. The engine achieves 48.5% electric generation efficiency. It also demonstrates excellent environmental performance with extremely low NOx emissions of 160ppm at 0% O2.

CF Limited Group and PondHop Automation

Provide Complete packaging and System Integration Capabilities for Gas Turbine Packages.

CF Limited Group Partnerships

www.hampton-power.com

www.pondhop.com

CF Limited Group and Hampton Power Systems¹ have formed a partnership focused on applications involving fabrication, integration and services relating to drive systems, motors and associated controls systems for a wide range of Applications. Applications include Drilling Rig Solutions for DC and AC Drive Line Ups, Drillers Cabins and Consoles. Available services relating to power systems include: startup supervision, product service training, harmonic analysis, ASD cable resonant frequency analysis, corrective filter systems, preventative maintenance programs, energy saving and power management analysis, application feasibility studies, retrofits from hydraulics, DC, eddy current couplings, WRIM (wound rotor induction motor), crane and hoist modernization.

CF Limited Group and PondHop Automation have formed a partnership combining as a premier control systems integration company with strong expertise in a wide variety of industrial markets.

CF Limited Group and PondHop has a proven track record in delivering superior performance and results to its customers. We have the capabilities required to execute the design, implementation, and startup of major industrial control system projects which include retrofit or grass root projects.

CF Limited Group and PondHop Automation manufactures Intelligent Artificial Lift Systems and RTU's. This proven technology provides for Lower Operational costs and Increased Production. Controls System provisions include the Fully Programmable "Auto Pumper" with Integrated Two Way Communications, SCADA Software and Systems Integration Support.

The Ward Leonard inverter rated AC induction motors are designed and manufactured specifically for use in oil patch applications. Based upon rugged motor designs currently found in the U.S. naval fleet, the Ward Leonard motor line with Horse Power ranges of 400, 550, 600, 1150, 1500 are built under documented in-process quality procedures that ensure product reliability under the most severe operating conditions.

Dolphins Software - Volts Electrical Design Software

VOLTS™ is a multi-award winning electrical design software program featuring:

- Ease of use
- Complete reporting
- Ability to handle both simplistic and complex projects.

**ControlTEK Automation
Solutions L.L.C.**
Total Electrical Knowledge

Hardware and Software Solutions for Energy
Management and Power Quality

ControlTEK Automation Solutions providing hardware and software solutions from individual components to Turn Key Solutions. Energy Efficiency begins with an Energy Management System designed and implemented on accurate measurement, monitoring and control of Power Systems, Process Systems and Balance of Plant Utilities. ControlTEKs' extensive range of automation products and solutions provide flexibility and expandability while eliminating wasted energy and money.

ControlTEKs' Energy Management Programs and Services provide the following and more:

- Energy Audits (Risk Management)
- Energy Consulting and Project Management
- Utility Information Management, Energy Efficiency Improvements and Sustainability Services
- Engineering Services
- Predictive and Preventive Maintenance Programs
- LEED-EB compliance
- Systems Integration for Implementing Energy Management Systems

CF Limited Group L.L.C.

Manufacturers Representative | Systems Integration

Introduction

- ❖ CF Limited Group L.L.C. functions as an Manufacturers Representative and Provider of Systems Integration Services

- ❖ Founded 1998

- ❖ CF Limited Groups' Business Plan Targeted Markets

Rig Power, Control and Instrumentation Systems

Oil & Gas Production

Refining / Petro-Chemical

Power Generation

Energy Management / Power Quality

Pipeline Compression

Automation Systems Security

Alternative Energy Solutions

- ❖ CF Limited Groups' companies and affiliates Engineering Design Teams have over 100 years of combined Electrical, Controls, Instrumentation Design, Software Development, Start-UP and System Integration experience with Systems Integration and Drives Sales greater than 10 Million Dollars.

- ❖ Manufacturers represented by CF Limited Group are Global Companies maintaining Domestic and International manufacturing facilities, supply, and support for their products and services. Disclosure of Manufacturers' sales and earnings are considered proprietary. Upon formal request from customers represented manufacturers will provide required information for Vendor and Project Qualifications.
